20CYS202 - User Interface Design - Airplane Ticket Booking System
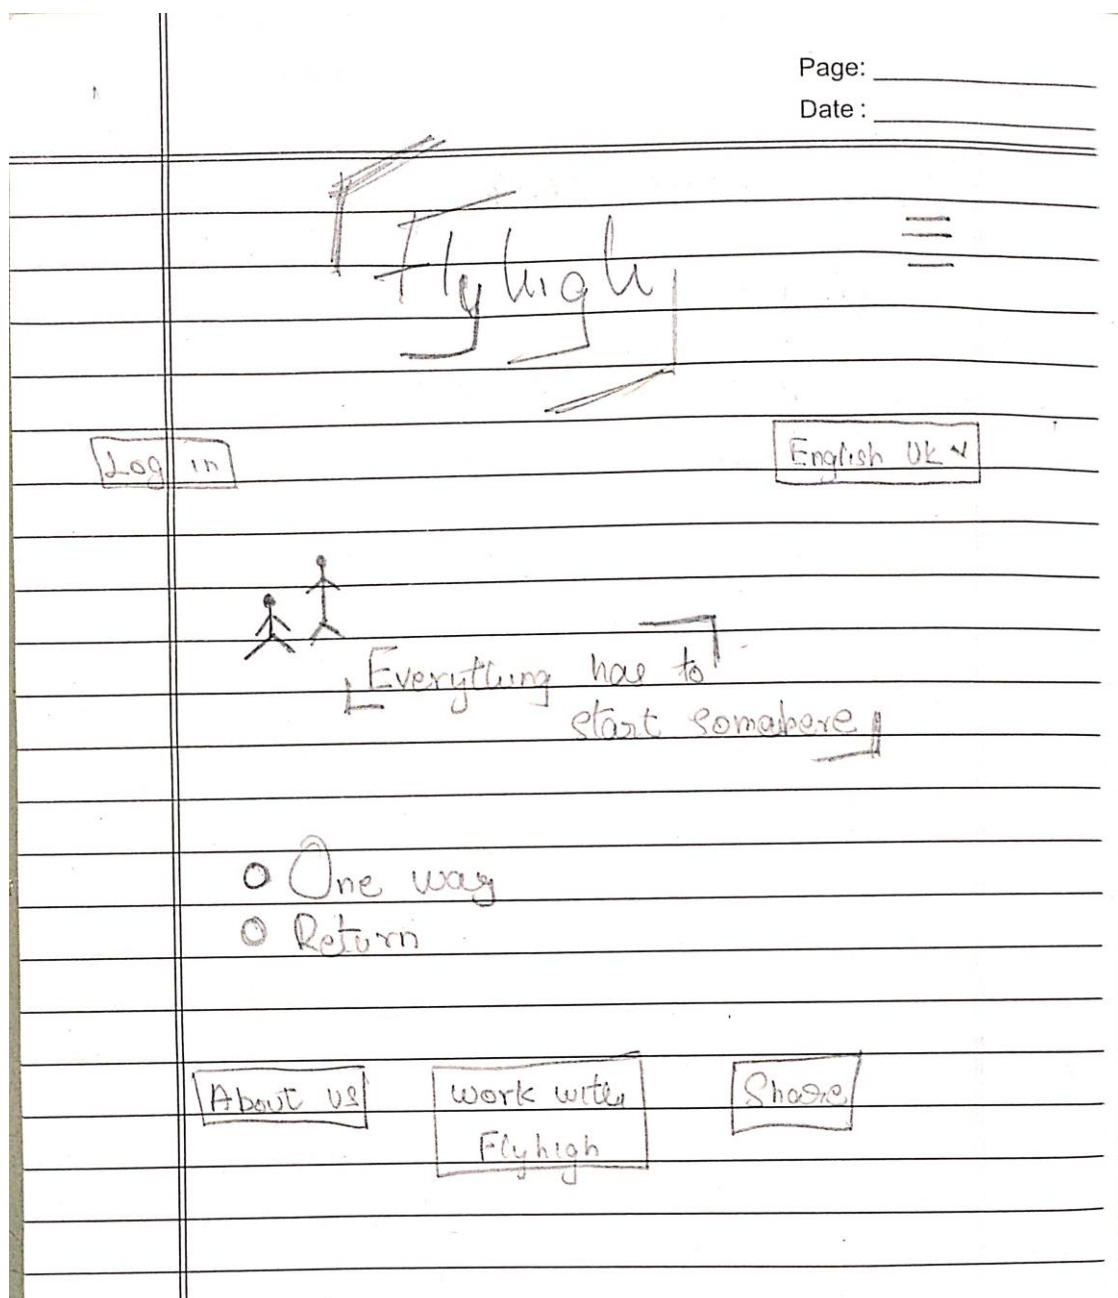

Mukesh SA

CB.EN.U4CYS21046

User Preference :   1) Option to change language

2) Help button

3) Suggest most used airlines and destinations

Usually the site logo is simple with an enthusiastic cover image

Most international sites like skyscanner, yatra use similar structure

The options menu is simple and easy to understand with options like :
    1) one way trip or return too
    2) option to select From city
    3) option to select Destination city
    4) simple calendar to select from and to dates
    5) option to select class
    6) passenger count selector
